Foreword

This directory contains references to the acts and regulations aiming especially at the safety and health of working people in Canada. It also incorporates other legislation having an impact on the welfare of workers such as air pollution control, the safe construction of buildings in general and safety standards in the transportation industry.

For each jurisdiction, there is mention of various topics that are important to the safety and health of workers. Indications are given, through the use of a code, concerning the legislation which deals with these topics. The first number of the code refers to the authority responsible for the legislation, the letter relates to the Act concerned and the second number to the pertinent regulations which have been adopted.

This directory which was prepared by Mr. Michel Gauvin, includes the most recent information made available to the Legislative Analysis group and for the most part is up to date as of January 1, 1981.

Because of the rapid changes in this field of legislation, this publication is revised on an annual basis. Should there be any error or omission in this issue, we would be grateful if you could let us know so that we may correct them in next year's directory. To do so or for any other comments, you may contact: M. Gauvin, Legislative Analysis, Labour Canada, Ottawa, Ontario, K1A 0J2; Tel. 997-3920.

It must be noted that our services do not provide copies of acts or regulations. Normally, these can be obtained from the department, board or agency which is charged with the administration of the legislation as indicated in the publication or from the Queen's Printer of the jurisdiction concerned (in Quebec: Editeur officiel).

Avant-propos

Ce répertoire comprend des références aux lois et à leurs règlements d'application ayant pour but principal la protection de la santé et de la sécurité des personnes travaillant au Canada. Sont aussi incluses, certaines autres lois qui ont un impact sur le bien-être des travailleurs comme par exemple le contrôle de la pollution de l'air, les exigences quant à la sécurité des édifices en général et les normes de sécurité dans l'industrie du transport.

Dans le cas de chacune des administrations, il est fait mention de divers sujets qui sont importants pour la santé et la sécurité des travailleurs. Des indications sont fournies à l'aide d'un code, concernant la législation qui traite de ces sujets. Le premier chiffre du code réfère à l'organisme responsable de la législation, la lettre se rapporte à la loi concernée et le second chiffre indique les règlements pertinents qui ont été adoptés.

Ce répertoire qui a été préparé par M. Michel Gauvin, contient les renseignements les plus récents mis à la disposition du groupe d'Analyse de la législation. En majeure partie, le document comprend les modifications à la législation survenues avant le 1er janvier 1981.

A cause des changements fréquents dans ce secteur de la législation, cette publication est révisée sur une base annuelle. S'il vous arrivait de constater quelque erreur ou omission dans cette édition, nous vous serions reconnaissants de nous le laisser savoir de façon à ce que les corrections appropriées puissent être apportées au répertoire de l'an prochain. Pour ce faire ou pour tout autre commentaire, vous pouvez contacter: M. Gauvin, Analyse de la législation, Travail Canada, Ottawa (Ontario), K1A 0J2; tél. 997-3920.

Il faut noter que nos services ne fournissent pas de copies de lois ou de règlements. Celles-ci peuvent normalement être obtenues du ministère, de la commission ou de l'organisme qui a la charge d'appliquer la législation tel qu'indiqué dans la publication, ou encore de l'Imprimeur de la Reine de l'administration concernée (au Québec: Éditeur officiel).
